

County of San Diego Health and Human Services Agency

MHSA Fiscal Year 2018-19 Annual Update Community Input Form

The Mental Health Services Act (MHSA), known as Proposition 63, was passed by voters in November 2004 and became a state law called the Mental Health Services Act (MHSA). Effective January 1, 2005, the MHSA provides State funding to counties for expanded and innovative mental health programs. MHSA programs support the County's vision of *Live Well San Diego* by providing the community services to assist with mental and behavioral health needs, education about the importance of mental health, and how to access necessary resources, so that all San Diego residents may lead healthy and productive lives.

As part of Behavioral Health Services practice and State requirements, the County is releasing for public review the draft *MHSA Fiscal Year 2018-19 Annual Update*. The update provides narrative and fiscal information about the current integration of MHSA services within the County of San Diego's Systems of Care.

We welcome all feedback regarding the plan. Please use this form to submit your thoughts by **September 5, 2018**. For more information visit the Network of Care Website at: <http://sandiego.camhsa.org>.

Please provide your feedback about the Three-Year Plan in the space provided.

(If printing and mailing, use back of form for additional space)
